

Uninterruptible Power Supply in South Sudan

Overview

What is the grid-based electricity situation in South Sudan?

At present, the grid-based electricity situation in South Sudan is characterized by routine power outages and lack of efficiency in the distribution system . In fact, in 2020, 580 GWh or nearly 100 % of electricity was produced from oil and gas, and just 1 GWh from renewable sources .

Does South Sudan have electricity?

As a result, the majority of the nation's electricity is produced by thermal sources, and supply is only available in a few urban centers, notably the capital Juba, Wau, and Malakal. Compared to neighboring countries, South Sudan has the lowest access to electricity (% of population) with only 7.7 % as of 2021 .

Why is South Sudan struggling to get electricity?

Despite having an abundance of energy resources, particularly fossil fuels, South Sudan struggles to give its citizens access to electricity. The long period of historical neglect of the region by the Sudanese government before independence and the recent conflict, is the primary cause of the current energy challenges.

Does South Sudan have a decentralized power system?

Most decentralized power systems in South Sudan are operated by private companies, NGOs and humanitarian organizations in South Sudan. In assessing the capacity of the off-grid electricity in terms of Megawatt (MW), the kVA rating of the generators and the power factor were taken into consideration.
