

VAT rate for solar container energy storage system supply

Overview

What is the VAT rate on solar?

VAT on a range of domestic energy efficiency and renewable energy installations, including solar, is now 0% in Great Britain. This is a reduction from the previous rate of between 5% and 20%. Eligible installations are those included on the Government's list of Energy Saving Measures (ESMs).

Do I have to pay 0% VAT on solar & energy storage?

Solar Energy UK recommendations to support the uptake of residential solar and energy storage. All solar and energy storage installations, including maintenance to existing sites, should be subject to 0% VAT. This should include residential energy storage when installed as a standalone measure.

Is there VAT on solar panels in the UK?

There's no VAT on solar panels or storage batteries across the UK for all households and charitable bodies. This 0% rate will last until at least 31 March 2027, when it's set to rise to 5%.

Which solar PV systems qualify for VAT exemption?

Both retrofitted systems added to existing solar PV arrays and standalone grid-connected battery storage will qualify for the tax exemption. Why is the UK government cutting VAT on storage?

This policy aims to tackle financial barriers slowing consumer adoption, support the integration of renewable energy and enhance energy independence.
