

Victoria Battery Energy Storage Station Planning

Overview

Does Victoria have a battery energy storage system?

Victoria fast-tracks battery storage project for a sustainable energy future: The Victorian Government is assisting a renewable energy developer fast track its Battery Energy Storage System —now approved through the Development Facilitation Program.

Why is Victoria a good place to store batteries?

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient.

How many large-scale storage systems does Victoria have?

Victoria has 12 commissioned large-scale storage systems and 3 in commissioning - with a total output capacity of 1028 MW and storage capacity of more than 1.7 GWh. Storage capacity = how much total energy is stored in each battery. Output capacity = how much energy a battery can provide at a given time.

What is the acenergy battery energy storage project?

As it happens, it was an Acenergy battery project that was first to be approved under Victoria's fast-track program; the Joel Joel Battery Energy Storage Project being developed in Victoria's Wimmera region at the same size and duration (350 MW/ 700 MWh) as the Little River BESS.
