

Vietnam 2025 Energy Storage Projects

Overview

How much power will Vietnam have by 2030?

The plan also called for 300MW of battery storage deployment and 2,400MW of pumped hydro energy storage (PHES) by 2030. State-owned public power company Vietnam Electricity (VE), is participating in a 50MW/50MWh grid-scale BESS pilot project which marks a first step towards that BESS goal.

Can battery energy storage systems stabilize Vietnam's grid?

Sunita Dubey and Hyunjung Lee share how Vietnam is leveraging Battery Energy Storage Systems to stabilize their grid and accelerate the energy transition.

What will Vietnam's energy future look like in 2030?

The government anticipates a 10-12% annual surge through 2030 in the nation's power consumption. This rapidly expanding energy demand presents a significant challenge to Vietnam's transforming energy landscape, especially considering the urgent need to reduce global emissions and utilise renewable alternatives.

How is Vietnam advancing its energy infrastructure towards an energy-resilient future?

Vietnam is advancing its energy infrastructure towards a greener, more just, and energy-efficient future, simultaneously providing a valuable model inspiring the global drive towards an energy-resilient future.

Vietnam 2025 Energy Storage Projects

[Vietnam Approves Major Solar & Battery ...](#)

Vietnam greenlights two new solar power plants and two large-scale battery storage systems (BESS) in its northern provinces to advance its renewable energy goals.
