

# Wall-mounted energy storage solution

## Overview

---

What are energy storage solutions?

They provide real-time data and information, relieve transmission and distribution network congestion, maintain Volt-Ampere Reactive (VAR) control. Together, startups working on energy storage solutions aim to simplify energy storage management.

What is a Powerwall battery?

Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can then use your stored energy to power the devices and appliances in your home day and night, during outages or when you want to go off-grid.

What is a Powerwall & how does it work?

Powerwall is a home battery system that can be charged from solar panels or the grid and is designed to withstand extreme weather conditions and harsh environments with minimal service or maintenance. It can maintain normal operation in cold temperatures, high humidity and flooding in two feet of water.
