

# What are the energy storage power stations in Iceland

## Overview

---

How many power stations are there in Iceland?

We operate fourteen hydropower stations, three geothermal power stations and two wind turbines for research purposes in five operating areas in Iceland. In operating power stations, emphasis is placed on a holistic vision, where prudence, reliability and harmony of the operations with environment and society are the guiding principles.

What is the capacity of the largest power station in Iceland?

The largest power station in Iceland has a capacity of 240 megawatts (mw). Other major hydroelectric stations are at Hrauneyjarfoss (210 mw) and Siglufjörður (10 mw). Efforts are underway by the government to export hydroelectric energy to Europe by transporting it via submarine cables.

Where is the largest hydroelectric power station in Iceland located?

For now, the largest power station in Iceland is Kárahnjúkar Hydropower Plant. It generates electricity in the north Vatnajökull area, which is needed for aluminum production. Historically, all the hydroelectric power stations are run by Landsvirkjun, the National Power Company of Iceland.

What is the main source of electricity in Iceland?

Hydroelectric power is the primary source of electric power for Iceland, accounting for 1.109 million kW of the total generating capacity of 1.460 million kW in 2002.
