

What are the main equipment of mobile solar container communication stations

Overview

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

What is HJ mobile solar container?

The HJ Mobile Solar Container comprises a wide range of portable containerized solar power systems with highly efficient folding solar modules, advanced lithium battery storage, and smart energy management.

How much power does a container wing provide?

Each wing can provide 3,3 kWp of nominal power (based on 410W solar panels). Upon arrival at their destination, the container wings can be extracted with our in-house trolley, unfolded, installed on the ground and wired to the pre-fitted control-room inside the container without any additional structural engineering.
