

# What are the national standards for imported battery cabinets

## Overview

---

What standards are used in a battery room?

Common standards in the battery room include those from American Society of Testing Materials (ASTM) and Institute of Electrical and Electronic Engineers (IEEE). Model codes are standards developed by committees with the intent to be adopted by states and local jurisdictions.

What is a standard in battery testing?

In layman's terms, a standard provides minimum requirements and/or instructions in agreement within the industry for common reference. Common standards in the battery room include those from American Society of Testing Materials (ASTM) and Institute of Electrical and Electronic Engineers (IEEE).

Are lithium-ion batteries regulated in China?

Lithium-ion cells and batteries produced in or imported into China are now regulated in accordance with China's Compulsory Certification (CCC) system.

Does a battery rack need to be NEBS certified?

Even if a company installs a NEBS-certified battery rack in a site, the building inspector can still require the rack to be certified to IBC or any other building code that city or state has adopted. Which seismic code or standard is the best fit?
