# Where are the Nanya solar container lithium battery charging stations

## Overview

---

What is the first large-scale sodium-ion battery energy storage station in China?

In May 2024, Southern Grid commissioned a 10 MWh sodium-ion battery energy storage station in Nanning, Guangxi province, the first large-scale sodium-ion battery energy storage station in China. The energy storage station can store 100,000 kWh of electricity on a single charge, which can meet the needs of around 12,000 households for a day.

How many kWh can a solar energy storage station store?

The energy storage station uses the latest high-capacity sodium-ion batteries with a top response speed six times faster than other existing sodium-ion batteries. It can store 800,000 kWh of electricity per day, which can be used by 270,000 households.

How many wind and photovoltaic plants can a battery storage station serve?

Utilizing better-performing sodium batteries, coupled with technologically mature lithium batteries and an output capacity of 200 MW, the storage station can serve more than 30 wind and photovoltaic plants and stations in Yunnan, Wang said.

Who makes the world's first high-capacity power sodium-ion batteries?

Hina Battery, a Chinese power battery maker, said yesterday that the energy storage station uses the world's first high-capacity power sodium-ion batteries made by the company. (Sodium-ion batteries used in the Baochi energy storage station. Image credit: Hina Battery)

## Where are the Nanya solar container lithium battery charging statics

### [China's 1st large-scale lithium-sodium hybrid ...](#)

The energy storage station uses the latest high-capacity sodium-ion batteries with a top response speed six times faster than other existing sodium-ion batteries. It can store 800,000 kWh of electricity per ...
