

Which country is the inverter for Cape Town solar container communication station connected to the grid from

Overview

Will Cape Town stop approving off-grid inverters for solar backup systems?

The City of Cape Town will stop approving off-grid inverters for use in solar backup systems to curb faulty and dangerous installations of these inverters in households that remain connected to the grid.

Does Cape Town need a solar inverter?

From 1 October 2023, Cape Town will require that new applications for solar PV and battery systems connected to a building's wiring use a city-approved inverter and obtain professional clearance. It will also refuse applications for standby and off-grid systems.

Are Cape inverters compliant?

A certificate of compliance is issued upon installation. All products have warranties. Contact our team for any sales or technical enquiries. Secure Payment options available. Cape Inverters are known as trusted experts in installing reliable, compliant inverters and solar backup systems to keep the power on during load shedding.

Will Cape Town become self-sufficient in energy generation capacity?

The Western Cape government wants to become self sufficient in energy generation capacity. Image credit: WCLG News Flash City of Cape Town mayoral committee member for energy, Beverley van Reenen, has confirmed that from October 2023, all solar PV and/or battery storage applications at the City of Cape Town will be treated as grid-tied systems.
