

Which is the first energy storage power station in Manchester UK

Overview

Could a £300m energy storage plant play a key role?

The backers of a pioneering £300m energy storage plant set for Greater Manchester say it could play a key role in the UK's net zero transition. Highview Power has announced it has secured investment from energy giant Centrica and the UK Infrastructure Bank to build the first commercial-scale liquid air energy storage (LAES) plant in the UK.

Could a £750m battery energy storage scheme be the world's largest?

Planning permission has been granted for a £750m battery energy storage scheme (BESS) near Manchester. Carlton Power, the independent energy-infrastructure developer behind the venture, said the 1GW facility at the Trafford Low Carbon Energy Park would be the world's largest battery-storage facility.

What is the UK's first grid-scale liquid air energy storage plant?

The UK is pioneering a new way to store power with the world's first grid-scale liquid air energy storage plant. The Pilsworth liquid air energy storage (LAES) plant, which is owned by Highview Power, opens on Tuesday in Bury and will act as a giant rechargeable battery, soaking up excess energy and releasing it when needed.

Will Carlton power build a 1GW battery energy storage scheme in Manchester?

Carlton Power secures planning permission for a 1GW battery energy storage scheme in Manchester, aiming for commercial operation in 2025. The project will strengthen regional energy security and surpass the current largest BESS in the world.
