# **Wholesale solar power storage in Hungary**

## Overview

---

Will Hungary build a solar factory in Northern Hungary?

There are plans to open a factory dedicated to building solar panels in Northern Hungary, representing an investment of 18.9 billion forints (nearly 6,000,000 USD). This new rapid growth can be attributed to Hungary choosing to follow in the footsteps of the European Union, which hopes to have 30+ percent renewable energy by 2030.

What is the largest solar project in Hungary?

The Hungarian Electricity Works (MVM) energy group constructed it, funding 65% of it and utilizing EU subsidies to cover the remainder. Like Kapuvár Solar Park, Paks Solar Park took the title of the largest solar project in Hungary during its establishment in 2019. Annually it is capable of providing electricity for roughly 8,500 homes.

Is solar power a viable option in Hungary?

Solar power has unique potential in Hungary, where 1950 – 2150 sunny hours offer the potential for 1,200 kWh/m<sup>2</sup> per year, greater than numerous other European nations. Other renewable energy solutions, like hydroelectric power, are less viable in the area.

Who is Solar & Solar Ltd?

Solar&Solar Ltd stands at the forefront of the solar industry as the premier operator of two distinct solar wholesale webshops, catering to both Hungary's specific market needs and the broader European solar energy sector.
